

MEDICARE CONNECT (PTY) LTD
CORRECTIVE ACTION & PREVENTIVE ACTION (CAPA) PROCEDURE

Aligned to ISO/IEC 27001:2022 Clause 10.1 & 10.2

Classification: Internal

Version: 1.0

Date: March 2026

Author: Patrick Mohlala, GRC Analyst

1. PURPOSE

This procedure defines the mandatory process for logging, investigating, remediating, and verifying non-conformities resulting from internal audits, external audits, security incidents, or regulatory reviews.

2. THE 5-STEP CAPA LIFECYCLE

STEP 1: Identification & Logging

Non-conformities are logged in the CAPA Tracker (Excel/Sheets) within 24 hours of identification, assigned a unique ID (CA-001, CA-002), and categorized by severity.

STEP 2: Root-Cause Analysis (RCA)

The assigned Action Owner must conduct a Root-Cause Analysis using the "5 Whys" methodology to determine the underlying failure rather than treating symptoms.

Example RCA:

- Problem : Laptops unencrypted.
- Why 1 : BitLocker was not turned on during setup.
- Why 2 : IT setup was performed manually.
- Why 3 : No automated policy enforced BitLocker.
- Root Cause : Lack of automated endpoint compliance policy in Microsoft Intune.

STEP 3: Remediation Plan & Target Date

The owner formulates corrective actions and assigns a realistic target date:

- Major NCs: Remediation within 15 Days.
- Minor NCs: Remediation within 30 Days.
- OFIs: Remediation within 60–90 Days.

STEP 4: Implementation

Action owner executes the plan and collects objective evidence of completion (e.g., policy document, script execution log, screenshot).

STEP 5: Independent Verification & Closure

The GRC Analyst / Internal Auditor reviews the evidence. If evidence is satisfactory, the CAPA is marked Verified Closed. If unsatisfactory, the CAPA remains Open.

3. SLA & ESCALATION TABLE

Severity	Target Clause SLA	Escalation Threshold	Escalation Contact
Major NC	15 Calendar Days	Overdue by 24hours	CEO & Board Audit chair
Minor NC	30 Calendar Days	Overdue by 5 days	IT Manager / Infor Officer
OFI	60-90 Calendar Days	Overdue by 14 Days	Department Manager
