

MEDICARE CONNECT (PTY) LTD
AWS FREE TIER SETUP GUIDE
For SOC 2 Evidence Collection (Portfolio Lab)

Author : Patrick Mohlala, GRC Analyst
Version : 1.0

1. OBJECTIVE

Build a free AWS lab and capture screenshots that prove core security controls.

2. BEFORE YOU START

- Use a personal email for AWS Free Tier
- Keep a folder on your computer: SOC2-Evidence
- Do not use real patient data
- Do not share access keys

3. SETUP STEPS

Step 1: Create AWS account

- Sign up for AWS Free Tier
- Complete account verification

Step 2: Protect root account

- Enable MFA on root user immediately
- Screenshot = EVD-001

Step 3: Create IAM admin user

- Create IAM user for daily admin work
- Enable MFA on that user
- Stop using root for daily tasks
- Screenshot least privilege group/policy = EVD-003

Step 4: Password policy

- IAM → Account settings → Password policy
- Enable complexity requirements
- Screenshot = EVD-002

Step 5: Create S3 bucket

- Create bucket with a unique name
- Block all public access = ON
- Default encryption = Enable
- Screenshots = EVD-006 and EVD-007

Step 6: Create CloudTrail

- Create trail
- Management events ON
- Log file validation ON
- Screenshots = EVD-004 and EVD-005

Step 7: Security Group hardening

- Create or edit Security Group
- Remove open admin access to the world
- Keep only required ports
- Screenshots = EVD-008 and EVD-009

Step 8: CloudWatch alarm

- Create one basic alarm
- Screenshot = EVD-010

Step 9: Backup configuration

- Configure snapshot/backup setting available in Free Tier context
- Screenshot = EVD-011

Step 10: IAM credential report

- Generate credential report
- Screenshot sample = EVD-012

4. AFTER CONFIGURATION

1. Fill Evidence Artifact Log dates
2. Update Google Sheets Control Matrix status
3. Write Implementation Report final numbers
4. Download all Docs as PDF and Sheet as Excel
5. Upload to GitHub folder 05-SOC2-Cloud-Mapping

5. SAFETY CHECKLIST

- ☐ MFA on root
- ☐ MFA on IAM admin
- ☐ No public S3 bucket
- ☐ No open SSH/RDP to 0.0.0.0/0
- ☐ No real personal data uploaded
- ☐ No access keys saved in GitHub

Document Control

Status: Final
