

**MEDICARE CONNECT (PTY) LTD
EXECUTIVE COMPLIANCE DASHBOARD
USER GUIDE & MANAGEMENT BRIEF**

Classification: Internal

Version: 1.0

Date: March 2026

Author: Patrick Mohlala, GRC Analyst

1. PURPOSE

This dashboard consolidates outputs from Projects 1 to 5 into one management view of compliance, risk, vendor assurance, incident actions, cloud evidence, and POPIA obligations.

2. WHO USES THIS DASHBOARD

- CEO : Posture and legal exposure
- Information Office : POPIA obligations and breach readiness
- IT Manager : Technical control delivery
- GRC Analyst : Maintenance, reporting, CAPA tracking
- Audit readiness stakeholders

3. HOW TO READ RAG STATUS

RED = critical, act now

AMBER = in progress / watch closely

GREEN = under control with evidence

4. WEEKLY REFRESH PROCESS (30–45 minutes)

1. Update Control Tracker statuses
2. Update open risks and residual scores
3. Update vendor agreement progress
4. Update CAPA due dates/status
5. Confirm cloud evidence still valid
6. Recalculate top KPIs on Executive Dashboard
7. Export PDF screenshot for EXCO pack

5. MONTHLY MANAGEMENT QUESTIONS THIS DASHBOARD ANSWERS

- Are we reducing critical risk?
- Are POPIA duties closed or overdue?
- Which owners are blocked?
- Are we audit-ready this quarter?
- What must be funded next month?

6. BASELINE STORY FROM PORTFOLIO PROJECTS

Project 1 identified control gaps.

Project 2 prioritised business risk.

Project 3 exposed vendor/POPIA contract gaps.

Project 4 established IR and 72h notification readiness.

Project 5 produced technical cloud evidence.

Project 6 makes all of it visible and actionable.

7. KNOWN LIMITATIONS

- Manual refresh (not automated GRC platform)
- Percentages are portfolio-modelled from project outputs
- Not a live production SOC telemetry feed

8. NEXT MATURITY STEP

Move from Google Sheets to a GRC tool (e.g., continuous control monitoring) once process discipline is stable.

Document Control
